

PLAYMORE

Community Starts Here

PROBLEM STATEMENT

Sports Community App that will allow them to connect with other like-minded people and encourage them to maintain a healthy lifestyle. The app should make it easy for users to connect with people who share similar interests, even when they are on the move.

DESIGN THINKING

①

EMPATHIZE

- Collaborated and conducted user interviews and surveys to understand the audience requirements and interests. The design resonated with their preference and needs.
- Focused on balancing the aesthetics and functionality to address the fast-paced nature of the audience.

②

DEFINE

- Identified the challenge: Create a sports community app for the students/professionals users with similar hobbies in their vicinity. This allows them to connect each other and invite/book for a game of their own interest. The app must provide a seamless, intuitive experience tailored to users who value efficiency and convenience.

③

IDEATE

- Studied competitor apps like Playo and KheloMore to understand how they streamline the sports booking process, analyzing the strengths and weakness of the button placements and layouts.
- Applies insights gained from this research to design the app that helps in overcoming the weakness.
- Created wireframes to validate the app's functionality.

④

PROTOTYPE

- Design mockups, UI Designs and interactive prototypes.
- Delivered prototypes for usability testing to gather feedback and improve the design iteratively.

⑤

TEST

- The final feedback design received positive feedback from the users.

USER INTERVIEWS

UX Designer

Can you tell me about your current fitness routine or sports activities?

I like to play Badminton, cricket. It's been a while since I have played any of those games. I used to play with my friends during college days.

UX Designer

What are the biggest obstacles you face in sticking to your fitness goals when you're in a new environment?

The main pain point is finding pals with similar interests. I could see many language groups formed in my company. Since I am an outsider, I find it difficult to mingle with other language people. I would like to find a platform which helps me to get accompanied to such similar interest people.

Client

Client

Client

How do you prefer to be notified about new activities or matches?

Push notifications, in-app alerts, group chats.

UX Designer

UX Designer

When you move to a new city or neighbourhood, how do you typically find fitness partners or groups?

I struggle to find pals for this.

UX Designer

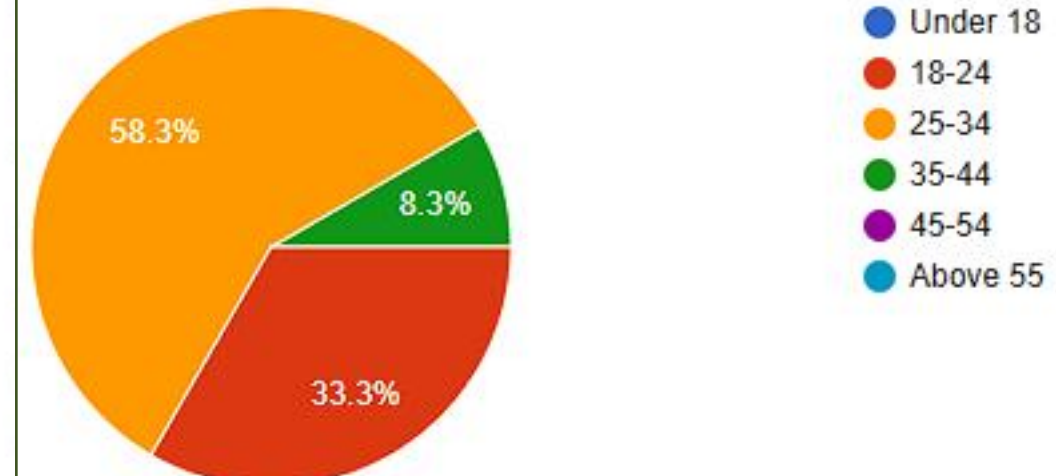

What are the biggest obstacles you face in sticking to your fitness goals when you're in a new environment?

Client 2

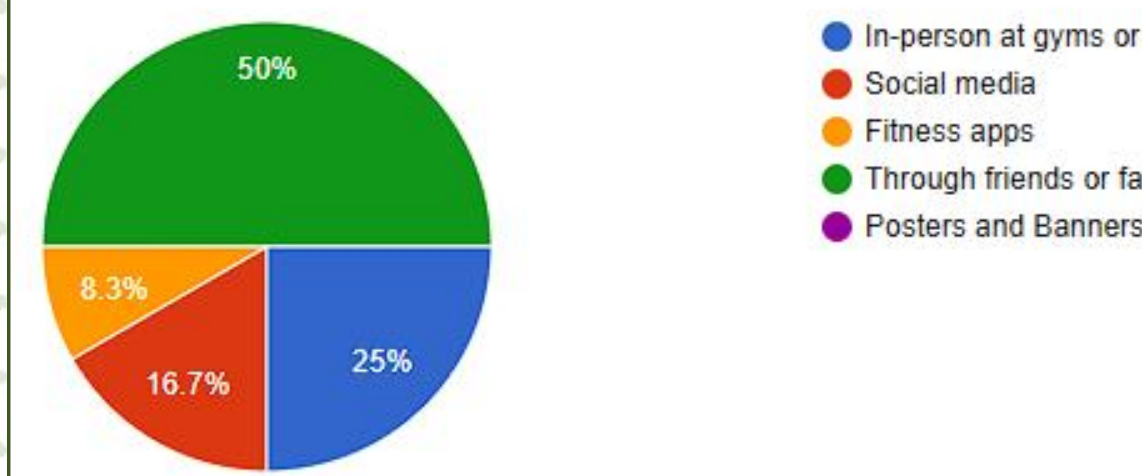

When I visit nearby turfs trying to find groups who is searching for a player to fill the sport, I found it difficult to get into the same. May be because the group is too experienced, so they refuse to call me the next time. I am a beginner level footballer. I would like to find people who are amateurish to the game so I can increase my skill along with them.
